WHO SAID WATER CAN'T LIGHT GAS???

1. Water enters the AQUA POWERED generator.
2. The turbine spins with water pressure.
3. A spark is generated by the turbine.
4. The spark ignites the main burner.
5. The water continues heat exchange and is heated.

- * Designed for a unique application.
- * Located internally (secured).
- * Ideal for multi story buildings.
- * Can be installed in a kitchen cupboard.
- * The heater is completely sealed.
- * Draws no air from inside.
- * Expels burnt gases to the atmosphere.
